

TATTOO AFTERCARE

- ▶ Take the bandage off after 2 hours
- ▶ Wash your tattoo with lukewarm water
- ▶ Dry it carefully and put Bepanthenol lotion on it
- ▶ Put the lotion on your tattoo 3-4 times a day
- ▶ For the first 2-3 nights you can put plastic wrap on your tattoo, preventing the tattoo from drying out and helping you sleep better
- ▶ No swimming, sauna visits, or baths during the time of healing – showering won't be an issue
- ▶ No intense sunbathing or solarium (tanning booth) for about 1 month
- ▶ Don't pick scabs or try to peel them off
- ▶ After 2-3 weeks your tattoo will be healed
